How to set up an **A5 Flyer** in Canva

Whether you're creating flyers for an upcoming event, promoting a special offer, or simply showcasing your brand, designing your own flyers can be a cost-effective and creative way to reach your audience.

Canva is an easy-to-use tool that allows you to design professional looking flyers without needing advanced graphic design skills!

To give you a helping hand, we've created a how to guide to assist with your set up for print in Canva, so make sure you save this for later!

1. Select a custom design

Start by choosing a custom design and enter the A5 measurements: 148mm by 210mm.

The screenshot shows the 'Create a design' interface. On the left is a sidebar with categories: For you, Docs, Whiteboards, Presentations, Social media, Videos, Print products, Websites, Custom size (highlighted), Upload, and More. The main area is titled 'Custom size' and contains three input fields: 'Width' with the value '148', 'Height' with the value '210', and 'Units' with a dropdown menu set to 'mm'. Below these fields is a purple 'Create new design' button. Underneath is a 'Suggested' section with a button for 'Zine 5.8 x 8.3 in'.

2. Make it print-ready

Add the bleed:

Go to Settings and select “Show Print Bleed” (typically 3mm). This ensures your design has no white borders after printing. With bleed, your A5 flyer will be 154mm by 216mm).

Turn on margins and rulers:

These tools help ensure that all your content stays within the printable area, avoiding any text or images getting cut off.

3. Customise your design

Add your text, images, and brand colours to create a design that captures your message.

4. Proof your final flyer

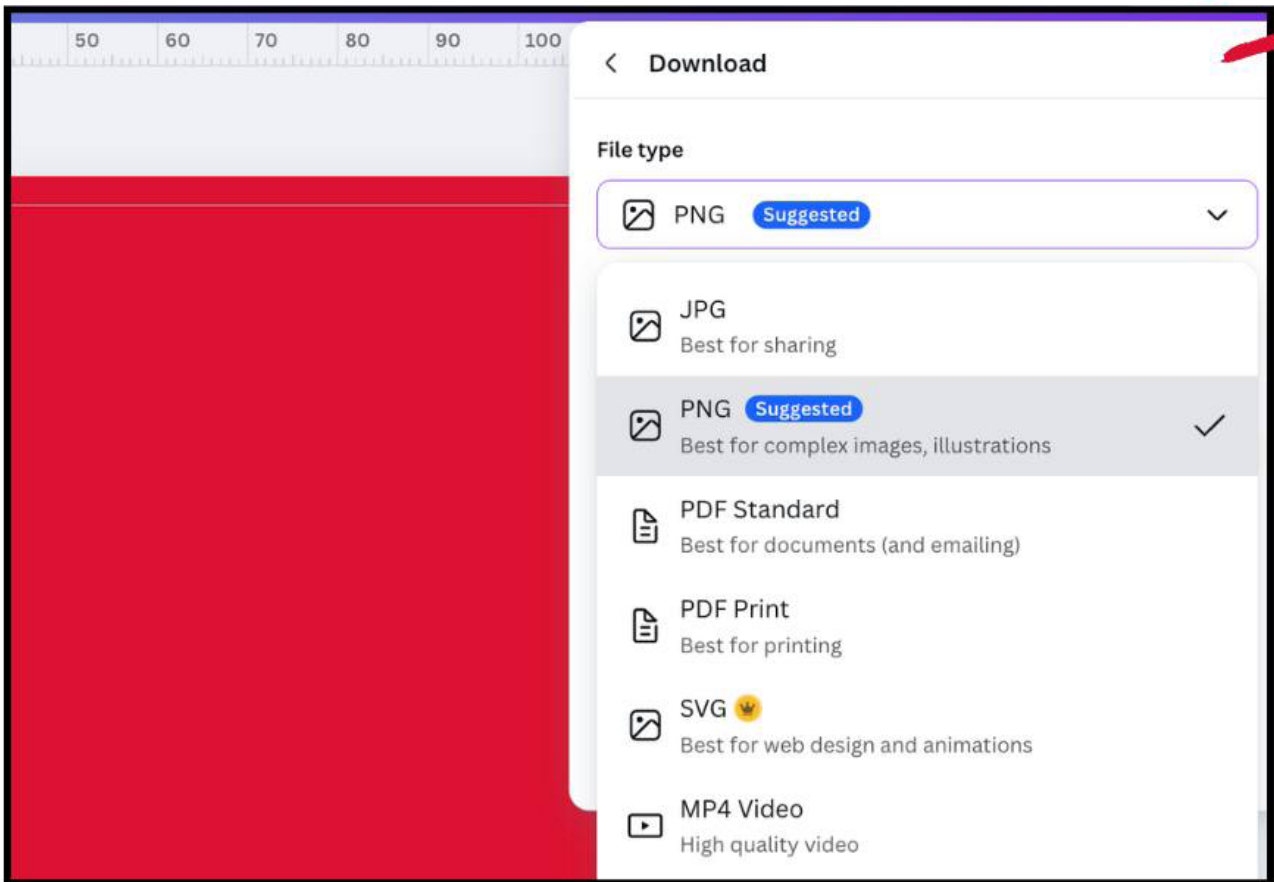

Double check your text and design for any errors or inconsistencies.

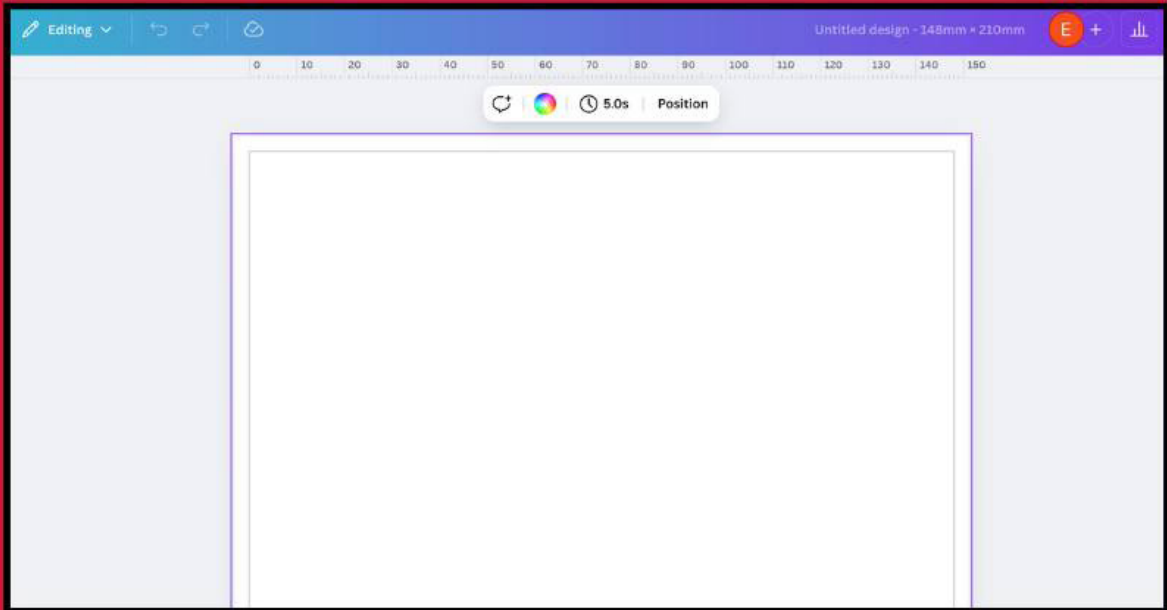

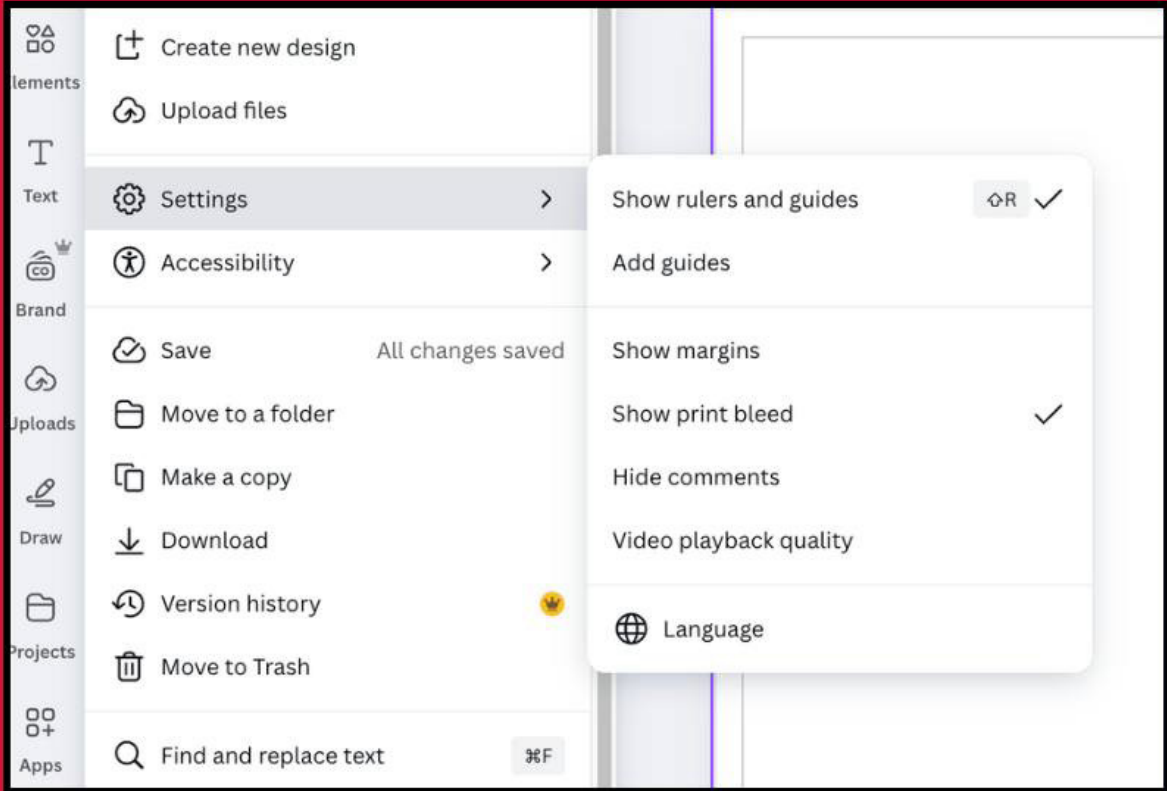

5. Export as a PDF

Once satisfied, export your design as a high-quality PDF for printing.
